

# SOUNDEX

## A ResourceMate® Add-on Module

The Soundex Add-on Module for ResourceMate® 3.0 adds a whole new way for your patrons to search. Gone are the times when your patrons can not get the results they're looking for just because of a spelling error or two. This great new module is available now for just \$99.

Soundex adds the power of phonetic searching to any of your patron searches. If you have a highly technical collection or simply one with difficult-to-spell items, Soundex will help your patrons tremendously! The Soundex module is also the perfect accessory to every school's Patron Search Screen.

The Soundex Add-on Module helps patrons by adding phonetic searching to any search that a patron chooses.

Soundex Enabled:

When this box is checked a phonetic search will be performed and spelling will not be as critical. Soundex works for all patron searches including title, author, subject and keyword. Let's use an example that you have a patron who is looking for books by C. S. Lewis. Ideally the patron would do an Author Search, and the term they would use is "Lewis, C. S." However, this may not always be the case. With Soundex if your patron enters Lewis in misspelled ways such as:

- loowis,
- luis, or
- loois,

the term "Lewis" will be found.

With the Soundex Add-on Module, your patrons are going to get so much more out of their searches and in turn – your library! Soundex is only \$99. To learn more feel free to download a demo of our software at [www.resourcecate.com](http://www.resourcecate.com) or contact a representative at [sales@resourcecate.com](mailto:sales@resourcecate.com) or call 1-800-815-8370!

## What if...

*... my patrons could have an easier time finding items in my library?*

*... my patrons' searches could be helped along so they can still get results even when they make spelling mistakes?*

*... I could have my patrons search phonetically so that they get a list of words that closely match the terms they entered?*

## You can!
