

AUDIT TRAIL

A ResourceMate® Add-on Module

The Audit Trail Add-on Module for ResourceMate® is a wonderful administrative and maintenance tool for your database. Audit Trail allows you to see who made changes to your program, to create reports on the changes and to revert back prior to certain changes. The Audit Trail module is available now for just \$195.

Audit Trail's features can be broken down into three main areas:

1. Track Changes

With Audit Trail there are many ways in which you can view the changes that have been made to your database. By looking at the Audit Trail tab for a particular item or patron, you can see what changes have been made to that specific record. You can also see all the changes made to your ResourceMate® program by viewing the full Audit Trail utility. And, when used in conjunction with the security features in ResourceMate® Plus you can even see which users made changes.

2. Create Reports

Using the Audit Trail Add-on Module, not only can you see what changes have been made, but you can also compile and print reports on your findings. Now you can keep hard copies of the work you've done, your volunteers have done and much more. Like all ResourceMate® reports these can be printed or exported to various file types for later use.

3. Revert to Previous Points

If you're looking to keep your data safe, one of the best features we offer comes in Audit Trail. This module allows you to revert individual records back to previous points and effectively undo changes that have been made to that particular record.

Although Audit Trail doesn't add a lot of flair to your ResourceMate® experience it more than makes up for its value by adding a tremendous amount of security. You'll never have to wonder about who changed your data and when and where it happened, and if anything serious gets changed you have the peace of mind knowing that you can always go back to a safe point! Audit Trail is only \$195. To learn more feel free to download a demo of our software at www.resourcecate.com or contact a representative at sales@resourcecate.com or call 1-800-815-8370!

What if...

...I could see a list of all the changes that I or any of my colleagues have made to my data?

...I wanted to know when a particular record was last edited?

...I needed a hard copy of all the changes that have been made to my information in any given period of time?

You can!
