

MULTI LANGUAGE

A ResourceMate® Add-on Module

The Multi Language Add-on Module for ResourceMate® is a must-have for any Library that wants to operate in a language other than English. It effectively adds a translation to many parts of the program so that you can use ResourceMate® in the language and character set of your choice! The Multi Language module is available now for just \$99.

Multi Language enhances your ResourceMate® program in the following ways:

- You can switch between languages while running ResourceMate® (English, French and Spanish translations of screen prompts provided) and you can translate into your own language!
- The Multi-Language Add-on Module shows screen labels in your chosen language. The font of screen entry fields can be changed so that it accepts the special characters of that language.
- Multi-Language does not do any automatic translation from one language to another. Also be advised that data is never translated. For example, Chinese titles will only be found when searched in Chinese. An item cannot be entered in Chinese and then found by searching for the English translated title.
- You may have to do the translation for your language if it has not been done. This is a table-based process of reading the English prompt and translating it to your language.

The Multi Language Add-on Module is a great addition to libraries that are not English-based and just as great for bilingual libraries! Multi Language is only **\$99**. To learn more feel free to download a demo of our software at www.resourcebate.com or contact a representative at sales@resourcebate.com or call 1-800-815-8370!

What if...

... I wanted to have my screen display in English and in another language?

... I wanted different users to see the program in different languages?

... I need a solution for my multi-lingual library with patrons who prefer to use a language other than English?

... my first language and that of my patrons is not English? Can I still use ResourceMate®?

You can!
