

# SPELL CHECKER

## A ResourceMate® Add-on Module

The Spell Checker Add-on Module for ResourceMate® is a great addition to the program. This module is a fantastic way to increase the accuracy of your cataloging, which in turn increases the usability of all your data! The Spell Checker module is available now for just \$49.

Spell Checker for ResourceMate® is superior to the average spelling help utility you'll find in many popular programs. Some of the features in the Spell Checker module include:

- **Automatic Checking**

You can use Spell Checker to look over your data at any time by pressing the "Spell Check Record..." button. However, you can also have Spell Checker automatically look over your data when you save your current record.

- **Volunteer Usage**

To better keep your volunteers' data entry in line with your own, Spell Checker will now work on all installation types of ResourceMate®.

- **Customizations**

When cataloging a collection, you're often entering data that consists of not only common words, but also names, places and even numbers. With the Spell Checker Add-on Module you can customize how it searches to avoid mistakenly picking up correct data. Not only can you set Spell Checker to skip checking certain fields, but you can set different ways in which it can search. Spell Checker customization allows you to skip internet addresses, quotes, abbreviations and much more so that you save time and effort by not having to weed through correct data that has been mistakenly reported.

With the features available in the Spell Checker Add-on Module, you'll have an intuitive and highly effective spelling utility that will help you increase the precision of your data! Spell Checker is only \$49. To learn more feel free to download a demo of our software at [www.resourcebate.com](http://www.resourcebate.com) or contact a representative at [sales@resourcebate.com](mailto:sales@resourcebate.com) or call 1-800-815-8370!

## What if...

*... I could use a reliable spell checker to check my item and patron records?*

*... I wanted my volunteers to be able to use that spell checker also, so that their records are more consistent with mine?*

*... my spell checker could automatically check my records once I'm done with them?*

*... I could get a spell checker that will allow me to make some fields (like name fields) exempt?*

## You can!

**With the ResourceMate®  
Spell Checker  
Add-on Module for just \$49**
