## Database server installed on Vista or Windows 7

This article pertains to the New ResourceMate Family of Products

Named pipes needs to be enabled on the server computer if the ResourceMate database server has been installed on a Vista or Windows 7 computer.

Click on Start, All Programs, Microsoft SQL Server 2008, Configuration tools, SQL Server Configuration Manager.

On the left side click on SQL Server Network Configuration. On the right side set "Named pipes" to enabled.

On the left side click on SQL Server Services. on the right side, right click on SQL Server and choose "Restart".
