## Warning 4154 . SQL Server ..... prerequisite was not correctly installed

This article pertains to the New ResourceMate Family of Products.

This warning is issued when you are attempting to install the "ResourceMate Database Server" from the ResourceMate Installation CD (or downloaded file).

If you received this message, three additional pieces of software may be required for your Windows Server environment.

Please download and install the appropriate software from the links below and then re-try the database installation from the ResourceMate Installation CD.

**Note that the installations of the software in the links below may require a reboot of the server.**

### 1) Windows Installer 4.5

<http://www.microsoft.com/en-us/download/details.aspx?id=8483>

### 2) Windows PowerShell 2.0

<http://support.microsoft.com/kb/968929/en-us>

Links for download on this one is about half way down the page.

### 3) .Net 3.5

<http://www.microsoft.com/en-ca/download/details.aspx?id=21>
